Guinea-Pig Anti VIP
Polyclonal
Cat. no. PS249

**Specificity**
Immunogen: Synthetic human VIP (code 7161, Peninsula). Tested on human, pig, rat and guinea-pig tissues. Positive control: Stefanini-fixed frozen sections of rat intestine. Absorption with 10-100 µg VIP per ml diluted antiserum abolishes the staining, while PHI does not.

**Use**
Works on: Paraffin and frozen sections. 1:1000-1:2000 using immunofluorescence, with overnight incubation at +4°C.

**Presentation**
50 µl undiluted, freeze-dried antiserum. Dissolve the antiserum in 50-100 µL distilled water, and dilute further in 0.1M PBS with 1% BSA and 0.1% NaN3.

**Literature**

**Storage**
Freeze-dried at 4-8°C until expiry date.
Reconstituted in small aliquots at -20°C.

FOR RESEARCH USE ONLY, NOT FOR DRUG, DIAGNOSTIC OR OTHER USE.
