

Mouse anti-CD56 (NCAM), clone CD564 (monoclonal)

Clone no. CD564 MONXtra

Product name Mouse anti-CD56 (NCAM), clone CD564 (monoclonal)

Host Mouse

Applications IHC-P (1:100)

Species reactivity human

Conjugate -

Immunogen Prokaryotic recombinant protein corresponding to a region of the

extracellular domain of the human CD56 molecule.

lsotype lgG2b

Clonality Monoclonal

Clone number CD564

Size 1 ml

Concentration Greater than or equal to 11 mg/L

Format -

Storage buffer Tissue culture supernatant with sodium azide

Storage until expiry date 2-8°C

FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES

Product datasheet MONX10843

Mouse anti-CD56 (NCAM), clone CD564 (monoclonal)

Clone no. CD564 MONXtra

Additional info

The neural cell adhesion molecules are a family of closely-related cell surface glycoproteins thought to play a role in embryogenesis, development and contact-mediated interactions between neural cells. The CD56 antigen (NCAM) consists of four major isoforms generated by differential splicing of the RNA transcript from a single gene located on chromosome 5. The CD56 antigen is expressed on neurons, astrocytes, Schwann cells, NK cells and a subset of activated T lymphocytes.
