|                           |                                           |
|---------------------------|-------------------------------------------|
| Product name              | Mouse anti-Desmin, clone D33 (Monoclonal) |
| Host                      | Mouse                                     |
| Applications              | IHC-P (1:50), IHC-fr (1:50)               |
| Species reactivity        | human                                     |
| Conjugate                 | -                                         |
| Immunogen                 | Human Desmin from leiomyoma               |
| Isotype                   | IgG1                                      |
| Clonality                 | Monoclonal                                |
| Clone number              | D33                                       |
| Size                      | 1 ml                                      |
| Concentration             | 20 ug/ml                                  |
| Format                    | -                                         |
| Storage buffer            | 0.01M PBS with 0.01M azide                |
| Storage until expiry date | 2-8°C                                     |

Mouse anti-Desmin, clone D33 (Monoclonal)

Clone no. D33

MONOSAN

**Additional info**

This antibody is highly reactive with desmin. On immunoblots only the 52 kD desmin band is stained. Immunogen derived from human Leiomyoma. No cross reactivity with GFAP, Keratin, Vimentin or Neurofilament detected.
