

Mouse anti-Giardia Lamblia, clone 6231

Clone no. 6231

MONOSAN

---

Product name	Mouse anti-Giardia Lamblia, clone 6231
Host	Mouse
Applications	WB,IF
Species reactivity	protozoan
Conjugate	Purified
Immunogen	65 kDa <em>Giardia</em> antigen.
Isotype	IgG1
Clonality	Monoclonal
Clone number	6231
Size	0.1 mg
Concentration	0.1 mg/ml
Format	-
Storage buffer	PBS with 0.09% sodium azide
Storage until expiry date	2-8°C

FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES

## Mouse anti-Giardia Lamblia, clone 6231

Clone no. 6231

MONOSAN

**Additional info**

Mouse anti Giardia lamblia antibody, clone 6231 recognizes Giardia lamblia, a flagellated protozoan parasite which infects the small intestines of humans and a variety of other mammalian hosts. Infection by G. lamblia results in giardiasis; a type of gastroenteritis that causes severe diarrhea and abdominal cramps. It has been suggested that chronic giardiasis can result in long-term growth retardation (Simsek. et al. 2004).
