

Mouse anti-Human CD11a

Clone MEM-83

Cat. no. MON 1151

Specificity

MON 1151 reacts with CD11a (alpha subunit of human LFA-1), a 170-180 kDa type I transmembrane glycoprotein expressed on B and T lymphocytes, monocytes, macrophages, neutrophils, basophils and eosinophils.

Immunogen: Human peripheral blood lymphocytes

Immunoglobulin type

Mouse IgG1

Use

The antibody can be used for flow cytometry, and IP.

Presentation

100 µg (1 mg/ml) purified antibody in Phosphate buffered saline (PBS) solution containing 15 mM sodium azide.
